Commentary

Economic Review: Central bank in its latest Monetary Policy Statement has slashed policy rate by 100 basis points to 11%, . The decision incorporates foresight for inflation which has dropped to 0.3% YoY in April, driven by lower food and electricity prices. Also, Central Bank took comfort on pace of Core inflationary figure of 7.4% and 9% for Urban and Rural areas respectively, expanding real spreads. Meanwhile, the U.S. FED maintains interest rates at 4.25% with US inflation ~ 2.4% as world gauge impact of trade barriers. As the uncertainty continues over the global landscape leaving its footprint on the local economy, International Monetary Fund (IMF) negotiations remains key for sustained investor' confidence. A key risk on downward revision of GDP growth rate to 2.6% arising from challenges in industrial sector and agriculture sector performance. Slowdown in global demand also positively impacted oil import bill for the country with current account continuing to post surplus and foreign exchange reserves reaching at a steady USD15.44 billion with state bank holding USD10.5 billion. Looking ahead, Pakistan is seeking to secure a \$1 billion arrangement under the IMF's Resilience and Sustainability Facility (RSF) and unlock \$1.3 billion under a new climate and resilience program. On money market front, In the recent T-bill auction conducted by the State Bank of Pakistan, the government raised PKR561.99 billion against a participation of ~PKR1,500 billion with weighted average yields at 12.14% for 1-month, 11.98% for 3-month, 11.96% for 6-month, and 11.97% for 12-month T-bills.

Stock Market Review: On the monthly basis, the KSE 100 recorded a loss of ~5.50%, while the KMI30 also demonstrated negative returns, marking a decline of ~9.13% as the rising regional tensions in the subcontinent fueled market uncertainty, adding to existing economic pressures. Heightened military activity and diplomatic strain triggered investor caution, leading to increased volatility and pressure on the local currency. The fertilizer sector faced a decline due to inventory issues, reduced sales, and regulatory challenges. The oil sector saw a notable drop due to global price fluctuations and domestic production challenges, while the pharmaceutical sector struggled with regulatory hurdles. The market remains reactive to any developments, with geopolitical risks dampening recovery prospects. During the month, foreign investors exhibited a net selling position in the tune of USD 9.5 million, bulk of selling came from foreign corporates while overseas Pakistanis remained net buyers during the period along with local companies and local banking institutions while local Insurance companies remained net sellers. Going forward, the market's current valuations suggest limited downside risk, and a cautious optimism prevails as investors anticipate stability and potential recovery in the coming months.
