Commentary

Economic Review : FY2024 is set to conclude on a path of economic stabilization, marked by improved macroeconomic indicators. Easing inflationary pressures, stable external accounts and exchange rate, fiscal consolidation, and a gradual recovery in industrial activities are boosting the confidence of economic agents, thereby fostering economic growth. The inflation outlook for June 2024 has experienced a slight uptick compared to the previous month. The National CPI kept hovered at 12.6%, driven by rising vegetable prices and Fuel cost adjustments being passed on to consumers. Meanwhile, real interest rates are showing a positive trend while also maintains the Current Account deficit. Externally, there has been a sustained improvement in the current account balance. For the period of July to May FY2024, the current account reported a deficit of \$0.5 billion, a significant improvement from the \$3.9 billion deficit recorded last year. This improvement is largely due to better trade balances and increased remittances. As of June 26, 2024, Pakistan's total liquid foreign exchange reserves rose to \$13.1 billion, the State Bank of Pakistan (SBP) held \$7.9 billion, while commercial banks' reserves amounted to \$5.2 billion. Following the budget announcement, the immediate impacts on the Pakistani Rupee (PKR) and overall market sentiment were closely examined. The Finance Minister's confident assertion of securing an IMF agreement by July sparked a surge in market activity, prompting exporters to show a strong interest in selling short-term forwards. However, the budget revealed a significant \$20 billion financing gap, comprising \$18 billion in foreign loan repayments and \$2.5 billion in short-term credits. This substantial financial deficit underscores the urgent necessity for IMF support and external funding to stabilize Pakistan's fiscal situation amid challenging conditions. Regarding inflation and interest rates, the government's budget presents a blend of ambition and realism: it aims for a GDP growth rate of 3.6% and forecasts inflation at 12%. The outlined revenue targets and increased expenditures, particularly for debt servicing, suggest an inflationary outlook. If global oil and commodity prices remain stable, achieving the 12% inflation target seems feasible. However, the fiscal plan indicates that an average interest rate of 15-16% for FY 2024-25 is sensible, with a potential reduction to 10-11% by June 2025.

Stock Market Review: During the month, the KSE 100 recorded a gain of 10.33%, and the KMI 30 also showed positive returns, marking a 5.84% increase. Notably, the Commercial Banks, Fertilizers and Pharmaceuticals have experienced positive sentiments. The Central Bank maintained a stable policy rate, leading market participants to adopt a stable approach, anticipating the peak of the interest rate cycle. Notable performers in the KMI 30 index for the month included FABL, AIRLINK, UNITY, PIOC and NETSOL witnessing increased trading prices. Conversely, ATRL, SYS, PRL, ILP and TPLP experienced noticeable decreases in their trading prices. The overall budget impacts various sectors differently. It is positive for the Auto Assemblers & Parts, Pharmaceutical, and Tobacco sectors, where government interventions are designed to modify costs, influence demand patterns, and potentially reshape the competitive landscape. Conversely, the budget is neutral for Banks, Chemicals, Technology, E&P, Refinery, Sugar & Allied Industries, and Food & Personal Care Products. However, it negatively affects the Textile & Leather, Cement, Steel, Cable & Electrical Goods, Telecommunication, and Fertilizer sectors due to increased sales tax or the withdrawal of import duty exemptions.
