Commentary

Economic Review: Pakistan's GDP growth has shown encouraging signs of recovery and resilience during 2QFY25. In, 2QFY25, the GDP growth rate reached at 1.73%. The real sectors have shown positive trends specifically in agriculture and service sector. While the Industrial sector experienced a downturn, Large-Scale Manufacturing still managed a modest growth of 2.1% in January 2025. Although the inflation figures are gradually decreasing with a positive primary balance. During the month National CPI kept hovering at 0.7% as compared to 1.5% in the previous month~ with a significant drop in food & housing index being passed on to consumers. The Real Interest rate indicates on a positive trajectory while keeping a managed current account. The current account recorded a surplus of \$691 million, a significant improvement from the \$1,730 million deficit recorded during the same period last year due to a robust growth in workers' remittances surged by 32.5%, reaching a substantial \$24.0 billion during Jul-Feb FY2025, compared to \$18.1 billion in the corresponding period last year. In a positive trend, PKR: USD has stabilized, Pakistan's total liquid foreign exchange reserves stood at \$15.6 billion, with the State Bank of Pakistan holding \$10.6 billion, as of 28th March 2025. The country continues to comply with IMF program, with broadly supportive economic indicators reflecting a positive outlook. with the International Monetary Fund (IMF) on the first review of the 37-month USD 7 billion Extended Fund Facility (EFF). Subject to executive board approval, this agreement will unlock a USD 1.0 billion disbursement (SRD 760 million), bringing the total disbursement under the EFF to USD 2 billion. In addition, Pakistan has secured vital funding for climate resilience. The IMF has approved a \$1.3 billion loan under the Climate Resilience and Sustainability Facility, which will help address the country's climate challenges. The government's fiscal performance is showing upward trend, with direct tax collections for the 8MFY25 reaching PKR 3.25 trillion, surpassing the target of PKR 3.1 trillion. This marks a 12.5% increase from the previous year, providing crucial fiscal space. The economy is gaining from rising exports, imports, and remittances, which are helping maintain the current account at a manageable level. Backed by IMF assistance, climate financing, and stronger tax collection, along with steady GDP growth, Pakistan is well-placed to tackle economic challenges and maintain fiscal stability, laying a strong foundation for continued recovery and sustained economic stability in coming months.

Stock Market Review: On a monthly basis, the KSE 100 recorded a gain of 4.02%, while the KMI 30 also demonstrated positive returns, marking an increase of 8.06%. Notably, sectors such as Oil & Gas Exploration, Oil & Gas Marketing, Cement, and Pharmaceuticals experienced favorable market sentiment. Conversely, the Chemicals, Commercial Banks, and Fertilizers sectors underwent a period of consolidation. At the beginning of the month, the market faced a downturn, with the KSE-100 Index declining. However, by mid-month, the market rebounded as optimism grew regarding the resolution of circular debt and progress in negotiations with the International Monetary Fund (IMF). Market sentiment was shaped by several key factors, including the announcement of a staff-level agreement between Pakistan and the IMF, the stability of the USD/PKR exchange rate, external fund inflows, a slowdown in inflation, and a recovery in Large-Scale Manufacturing (LSM) growth. Looking ahead, we expect the market to sustain its positive momentum.
