Economic Review

Pakistan's GDP growth has shown encouraging signs of recovery and resilience during FY24. In Q3, the GDP growth rate reached an impressive 2.90%, significantly higher than the 1.79% recorded in the Q2 of FY24. The real sectors have shown positive trends specifically in agriculture. Although the inflation figures are gradually decreasing with a positive primary balance. During the month National CPI (Consumer Price Index) kept hovering around 11.8% as compared to 17.3% in the previous month ~ with a significant drop in food and transportation prices being passed on to consumers. The Real Interest Rate indicates on a positive trajectory while keeping managed a Current Account. The Current Account deficit for FY2024 (July-April) reduced significantly, dropping to \$0.2 billion from \$3.9 billion last year, mainly due to a better trade balance. In a positive trend PKR.USD has stabilized, indicating a favorable trend, especially with a notable increase in remittances on a year-on-year basis. Foreign Exchange Reserves showed stability with Pakistan's total liquid foreign exchange reserves rising to \$14.3 billion, with SBP's reserves at \$9.1 billion and commercial banks' reserves at \$5.2 billion. The upcoming Federal Budget for FY25, scheduled for June 7th, sets the stage for the country's potentially largest IMF program ever. This involves boosting tax collection through tax rationalization efforts. It has been expected that the FBR's tax collection for FY25 stands at Rs 11 trillion, marking a 17% increase from the budgeted tax collection of FY24. Additionally, an anticipated 18% GST on food is projected to contribute an extra Rs700 billion. The new government is reaffirming its dedication to the stringent measures implemented over the past 18 months to stabilize the economy, aiming to foster sustained growth and further bolster investor confidence.
