Commentary

Economic Review: The country faces severe monsoon along with flash floods in the north. This has primarily impacted the country's food basket. The government has taken steps to control damages, albeit loss of property remains imminent. This is also expected to translate into some supply-side shock which affects the flow of goods, impacting not only food supplies but also transport from the north – thereby affecting exports during the period. In addition to the supply shock, adverse impact on rabi crop sowing season can also affect the second half of the fiscal year, potentially forcing some realignment in the projected GDP growth. While the country is yet to filter news for an actual assessment, the prevailing sentiment dampens any expectation of a rate cut in the upcoming Monetary Policy Statement (MPS) by the central bank. Inflation for the month stood at 3% year-on-year easing from 4.1% in the previous month, reflecting relative stability in headline prices; however, risks remain tilted to the upside due to weather-driven supply disruptions, especially in food categories. The country marked a visible improvement in its foreign exchange reserves, which accumulated to ~USD 19,617 million compared to ~USD 18,976 million in July '25, with the PKR/USD rate maintaining around ~283 in the open market. On the external front, the trade deficit stood at over USD 6 billion, widening due to lower exports and higher imports compared to last year. These figures do reflect some impact of the recent floods, with future trade likely to reflect logistics and infrastructure disruptions in the export-critical northern regions. Although the current account remains in deficit, and the nominal exchange rate has been steady, any misalignment in the Real Exchange Rate (RER) going forward could affect external competitiveness and weigh on short-term macroeconomic stability.

Money Market Review: On the money market front, in the T-bill auction held on 20th August, 2025 the State Bank raised PKR 383 billion against a total participation of PKR 1,314 billion. The cut-off yields were set at 10.8996% for 1-month, 10.8502% for 3-month, 10.8501% for 6-month, and 10.9990% for 12-month tenors.

Stock Market Review: The month of August 2025 sustained the positive momentum in the domestic equity market, extending the bullish undertone seen at the outset of FY26. The KSE-100 Index continued its upward trajectory, registering a gain of approximately 6.62%, while the KMI-30 Index advanced by 7.85%, reflecting persistent investor confidence. The market's performance was underpinned by continued improvements in macroeconomic indicators, relatively stable inflation, and optimism around the external account. Investor sentiment remained broadly constructive, driven by expectations of monetary easing and a stable PKR, supported by a notable increase in foreign exchange reserves. Key sectoral performers during the month included Commercial Banks, Cements, Oil & Gas Exploration Companies and Pharmaceuticals. The rally, however, was not without volatility. A mid-month dip was observed, triggered by uncertainty surrounding the central bank's Monetary Policy Statement (MPS) and early concerns regarding the economic fallout from widespread flooding in the northern regions. Foreign investors recorded net outflows of USD 42 million during August, marking a continuation of cautious offshore positioning. On the domestic front, Individuals and Insurance Companies emerged as notable net buyers, absorbing foreign selling pressure and maintaining support at key technical levels. Looking forward, the market is expected to maintain its positive momentum, keenly eyeing upcoming macro data, monetary policy signals, and any revisions to FY26 GDP projections due to weather-related supply shocks.
