Commentary

Economic Review Pakistan's GDP growth has shown encouraging signs of recovery and resilience during 1QFY25. In Q1, the GDP growth rate reached at 0.92%. The real sectors have shown positive trends specifically in agriculture and Service sector. Although the inflation figures are gradually decreasing with a positive primary balance. During the month National CPI (Consumer Price Index) kept hovering around 2.45% as compared to 4.1% in the previous month ~ with a significant drop in food and transportation prices being passed on to consumers. The Real Interest Rate indicates on a positive trajectory while keeping managed a Current Account. The current account has significantly improved, posting a surplus of USD 1,210 million for 1HFY25, compared to a deficit of USD 1,397 million in SPLFY. This improvement is primarily driven by a notable rise in workers' remittances, which reached approximately USD 17,846 million in 1HFY25, up from USD 13,436 million in the same period last year. In a positive trend PKR.USD has stabilized, Foreign Exchange Reserves showed stability with Pakistan's total liquid foreign exchange reserves rising to \$ 16 billion, with SBP's reserves at \$ 11 billion and commercial banks' reserves at \$ 4.6 billion. The country continues to comply with the IMF program, with broadly supportive economic indicators reflecting a positive outlook. The GDP growth for FY2025 is projected to gradually improve, with the government forecasting a growth rate of 2.5%, while the IMF expects a slightly modest growth of 2.0%. In the money market, yields for government bonds have continued to decline, with cutoffs dropping to 11.94%, 11.89%, and 12.40% for 2-year, 3-year, and 5-year bonds, respectively. The market is anticipating further policy rate cuts of around 100 basis points, which are expected to provide continued support for economic growth.

Overall, Pakistan's economy is on an upward trajectory, with continued improvements in key indicators and ongoing efforts to foster stability and growth. The debt market is responding positively, and additional rate cuts could further support government borrowing and broader economic activity.

Stock Market Review: During the monthly basis, the KSE-100 Index recorded a negative return of ~0.76% while the KMI-30 Index also showed a negative return of ~3.73%. Notably The Commercial Banks, Fertilizer and Pharmaceuticals have experienced positive sentiments, while the Oil & Gas Exploration Companies, Cement, Chemicals, and Oil & Gas Marketing Companies experienced consolidation during this period. Foreign investors recorded net inflows of USD 8 million. Looking ahead, the index is expected to maintain a range-bound movement, navigating through political and macroeconomic developments. Market participants will be closely monitoring the potential impact of fiscal and monetary policy decisions.
