Commentary

Economic Review : Economic situation continues to stabilize during the period with easing inflation, exports growth notable in IT sector followed by strong remittances. Central Bank continued its monetary easing stance with market expecting further decline with 1yr PKRV trading at ~11.68% which enforce a strong cut in the upcoming monetary policy. Central bank also remained comfortable on inflation front with latest national CPI for Nov'24 stand 4.9% on y/y basis compared to 7.11% previous month aided primarily by favorable base affect and downtick in transport stratum with expectation of that average inflation will cool down to single digit for FY25. Stable exchange rate and soft monetary stance is expected to stimulate economy with focus of exports growth.

On the external front, the country successfully managed its current account deficit, with the position significantly improving due to robust growth in exports and remittances, despite a rise in imports. From July to October FY2025, the current account recorded a surplus of \$218 million, a remarkable turnaround from the \$1,528 million deficit in the same period last year. Total remittances for FY25 have reached US \$11,848.3 million so far. The stronger inflows will support Pakistan in stabilizing the PKR and managing the current account deficit. As of November 22, 2024, Pakistan's total liquid foreign exchange reserves stood at \$16.0 billion, with \$11.3 billion held by the State Bank of Pakistan.

Sustainable economic recovery hinges on sustained fiscal consolidation and adherence to prudent policy measures. Moreover, timely and sufficient financial inflows are essential to addressing gross financing requirements and maintaining stability in the exchange market. The ongoing economic situation has led to a renewed focus by the finance minister on emphasizing the importance of adhering to Pakistan's reform agenda, focusing on taxation, energy, SOEs, and public finances.

The economic managements have also pointed to progress on IMF agreements, including quantitative performance criteria, structural benchmarks, and continuous targets across fiscal, governance, social, monetary, financial, and energy sectors. Provincial governments were urged to align agricultural income tax laws with federal tax codes by January 2025. Concerns over the impact of increased agricultural taxes led to suggestions for incentivized compliance strategies.

Stock Market Review: During the month the KSE 100 recorded a positive return of 11.55 % and the KMI 30 showed positive returns, marking a 8.49% increase. Notably, the Chemical, Cement, Pharmaceuticals, Fertilizers and Oil & Gas Exploration Companies, Oil and Gas Marketing Companies have experienced positive sentiments. Continued easing has attracted investors' interest despite some short-term volatility witnessed by the market. Bourse continue to perform despite continued net foreign outflows aided by local players. Market continued rally amid softening monetary stance, stable PKRUSD and IMF initiatives although political stability, LSM growth and budgetary targets will have administer their weights on its smooth trajectory.
